ABSTRACT

One-hundred and forty-seven listings of reports, books, and periodicals comprise this bibliography of available works on nonformal educational programs in Africa, Asia, Latin America, the Middle East, Europe, the U.S.S.R., Canada, Australia, New Zealand, and island areas. This is a limited selection of materials since many of the programs have little public documentation or are in experimental stages. Some of the topics listed for each country include youth programs, land resettlement, adult education, agricultural extension, and national service programs. Categorized by geographic area, the reports are listed alphabetically by author. (JR)

FOREWORD

Many countries operate ongoing "non-formal" educational programs outside departments and ministries of education. Youth programs, land resettlement, adult education, agricultural extension, and national service programs, to mention only a few, are operating under multiple auspices.

This bibliography selects and identifies some of these programs by geographical areas. It is a limited selection, since many of these programs have had little public documentation or are in experimental stages, and sufficient data for any meaningful pronouncements is lacking. There is an urgent need to study and document such programs in terms of methodology, cost-benefit analysis, and outcome effectiveness. The lack of hard, analytical information on such "non-school" educational endeavors creates gaps in our knowledge which must be filled.

It is hoped that this bibliography in its limited form may assist those interested in pursuing the necessary task of investigating such programs.

Cole S. Brembeck, Director
